SMALL MACHINE ROOM PASSENGER ELEVATOR

Mashiba-Rhine Compact Elevator Series applies the latest integrated technology, utilizing a compact permanent magnet synchronous gearless traction (PMSM) and a special design control cabinet for space saving. A key feature of this elevator is that it ensures the area of the machine room is exactly the same as that of the well path, allow more freedom for architectural design. In addition, it allows more efficient building utilization ratio with improved design flexibility.

MACHINE ROOMLESS PASSENGER ELEVATOR

MASHIBA-RHINE Machine Room-Less Elevator Series offers a solution that overcomes various restrictions associated with traditional elevator systems. Eliminating the need for a separate machine room, this saves building space and cost while also enabling architects and developers to fully utilize their creativity in building design, presenting a higher level of creative freedom.

OBSERVATION ELEVATOR

MASHIBA-RHINE Observation Elevator Series is designed to enhance the overall aesthetics of a building, serving as an observation deck to highlight the elegance and beauty of the building. Incorporating modern materials and advanced technology which includes a fully computerized and variable voltage variable frequency (VVF) control technology, the observation elevator ensures smooth and precise operation while maintaining energy efficiency.

This elevator series provides passengers with a truly mobile scenic journey, allowing them to enjoy an unparalleled and exquisite visual delight. It is available in various shapes, including round, half-round, square, and cutting-angle types.
